Interior Decorating

Course Details

This part qualification is aimed primarily at giving the learner technical, theoretical knowledge, practical knowledge and workplace knowledge and skills required in their chosen occupational/vocational area.

The design of the part qualification is such that if taken sequentially with related N part courses i.e. N4+N5+N6, it enables learners to progressively obtain the National N Diploma once the required practical work component of either 18 months or two years, as required for the specific occupational area, is completed.

The part qualification as a single entity has value in the workplace as it equips learners with vital knowledge and skills that enable them to be productively employed at entry level positions in an occupation.

Qualifying Learners are Capable Of:

1. Identify and solve problems, using critical and creative thinking.

2. Work effectively with others as a member of a team.

3. Organise and manage himself and his activities effectively and responsibly.

4. Communicate effectively with clients, colleagues and suppliers.

5. Collect, analyse, organise and critically evaluate information.
